ABOUT ME

Final-year IT undergraduate passionate about Data Analytics, Quality Assurance, Machine Learning, and UI/UX Design. Experienced in developing user-focused software solutions and data-driven applications, with strong analytical, problem-solving, and teamwork skills. Seeking opportunities to apply technical knowledge and contribute to innovative projects.

EDUCATION

Bachelor of Science in Information Technology

Rajarata University of Sri Lanka

Expected Graduation: 2026

Successfully Completed Diploma in English (Extension)-2023/2024

Rajarata University of Sri Lanka

Successfully completed G.C.E Advanced Level Examination (2018–2020)

TECHNICAL SKILLS

- Programming Languages : C, C++, Python, Java
- Web Development : HTML, CSS, JavaScript
- Databases : MySQL
- Frameworks & Tools : Android Studio, Anaconda, Flutter, Qt, Postman, Selenium
- UI/UX Tools : Figma, Canva
- General IT Skills : Microsoft Office Package

SOFT SKILLS

- Communication
- Time Management
- Teamwork & Collaboration
- Problem Solving
- Adaptability

PROJECTS

Mango Ripeness Classification & Health Recommendation System (06/2025 – 03/2026)

- Developed an end-to-end machine learning system to classify mango ripeness (Raw vs Ripe) using numerical sensor, spectral, and chemical data.
- Implemented and compared models including 1D-CNN and traditional machine learning algorithms (Random Forest, SVM) using Python, TensorFlow, and Scikit-learn.
- Applied data preprocessing, feature engineering, and scaling techniques to improve model performance on a small dataset.
- Designed a health recommendation model based on glycemic index/load and nutritional factors to suggest consumption suitability.
- Integrated the ML models with a backend API and IoT-based sensor system (ESP32) for real-time prediction and mobile app interaction.
- Developed an Android mobile application using Flutter to display ripeness predictions and health recommendations.

Diabetes Risk Prediction (06/2025 - 08/2025)

- Developed a machine learning model to classify diabetes and non-diabetes cases based on lifestyle factors using Python in Google Colab.

Fungi Colony Detection (10/2024 - 12/2024)

- Developed a machine learning model to detect and classify fungi colonies from image datasets using python in Anaconda

Ceylon Sea Food Heaven website(06/2024-07/2024)

- Developed a responsive website to showcase Sri Lankan seafood products

Design Text Editor(04/2024 - 05/2024)

- Developed a feature-rich text editor with an intuitive user interface using the Qt framework.
